AFRICA
BASE METAL HOLDING

ABOUT COMPANY

Africa Base Metals is focused on the exploration and development of high-potential copper and base metal assets across Africa. With access to quality exploration and mining licenses in Zambia, we are strategically positioned to unlock the region's significant mineral potential and develop future world-class mining operations.

Our activities span prospecting, exploration, resource development, strategic financing, and logistics solutions, creating an integrated platform for responsible mineral development.

With a strong focus on copper and other critical base metals, Africa Base Metals aims to support the growing global demand for minerals essential to energy transition, electric vehicles, renewable power, battery technologies, and modern infrastructure.

Through strategic partnerships, technical expertise, and a long-term approach to asset development, we are committed to creating sustainable value while contributing to the growth of Africa's mining sector.

VISION & MISSION

Vision

Our vision to be leader in energy Transition by developing critical minerals and becoming business partner with major mining houses to prospect, explore, develop and mine critical minerals. We would like to be world class trade and investment partner through growth, excellence, innovation and empowerment.

Mission

Our Objectives is to create maximum value for all our stakeholders in safe and sustainable operations, and to serve our host communities. Our strategy is supported by high standards of corporate governance, which we review regularly to ensure robust reporting and strong relationships with our stakeholders. We understand that adhering to the highest standards of corporate governance is fundamental to the sustainability of our business.

OUR PORTFOLIO

Prospecting, Exploration and Mining

We have access to a significant number of prospecting licenses, mining permits, and mining licenses, where the conceptual study has been completed and is at the next phase of exploration and mine development. In addition to that, we also of access to a very rich quality of mining assets which are available for sale due to various reasons but can be reopened with minimal funding and the right technical partners. With our global network of international investors, we continue to conclude a number of deals across Africa. We continue to grow our portfolio of mining assets and through our most experienced team, we continue to develop them through the right partners.

EV Battery Trading

Africa Base Metals specializes in the trading and import of advanced EV batteries. We ensure high-quality, reliable products sourced from leading global manufacturers. Our focus is on powering India's transition to clean and efficient electric mobility. With a strong supply chain and market insight, we bridge demand and innovation. We are committed to delivering scalable energy solutions for a sustainable future.

OUR PORTFOLIO

Strategic Investment and Structuring

We have access to a significant number of prospecting licenses for all future minerals throughout Africa. On the other hand, we have trusted relationships with many international investors and financing partners who are ready to invest in exploration to develop these prospecting licenses. We continue to expand our portfolio of prospecting license holders and international investors to bring them together to find the best suitable partnership. We are an investment house and continuously capitalizes on financial investment opportunities in various start-ups, new minerals assets in form of Royalty, equity, off-take and other business ideas to accelerate their growth globally.

Waste to Wealth Creation

We are diversified and leading metals and scrap recovery business with a world-class portfolio of assets in Africa. We create value for all stakeholders by converting tailings, scrap and waste material into wealth. We are expert in the retreatment of historical waste rock, tailings, and ROM ore generated from mining operations. We create both financial and social wealth that delivers value for our stakeholders in a sustainable manner and create Green Economy through the reduction of waste footprint and production of energy metals.

OUR PORTFOLIO

Business Trade, Import and Export

We physically source these commodities and products from our global supplier base, and sell them to customers all over the world. This means transporting commodities by sea, rail and truck, storing them, processing them, and delivering them to the time, quality and specification that our customers need. Through these marketing activities, we set ourselves apart from companies who focus mainly on commodity production.

HOW WE WORK

1

We acquire high-potential critical mineral licenses in strategically chosen regions, guided by geological data and long-term market demand.

2

Our approach is collaborative and compliant, working closely with government authorities, local communities, and technical partners to ensure transparent and responsible development.

3

We follow a phased development model — moving from prospecting to exploration and project advancement — enabling equity investors to participate in a structured, milestone-linked manner.
